

Cleaning & Grease Removal

Industrial Cleaner

is used for hard to remove to substances including grease, oils, and tape residues. The industrial cleaner is based on citrus oil and does not contain chlorinated solvents. Neutral pH. It does not corrode and gently cleans sensitive aluminum and steel surfaces, as well as painted surfaces and most plastics.

S-151 Grease Removal Agent

is based on liquid isopropyl alcohol and it prepares the surface for bonding.

1753 - Surface Cleaner Sachet

is soaked with isopropyl alcohol and serves for easy removal of grease before bonding.

High Performance Cleaning Cloth

produced of flat microfibers thanks to which it removes dirt from the surface with high efficiency.

It is used with success in:

- glass manufacturing
- optics and electron optics
- furniture industry
- production of musical instruments
- body shops and car paint shops.
