

Paper Masking Tapes

General Purpose Masking Tapesecné použití

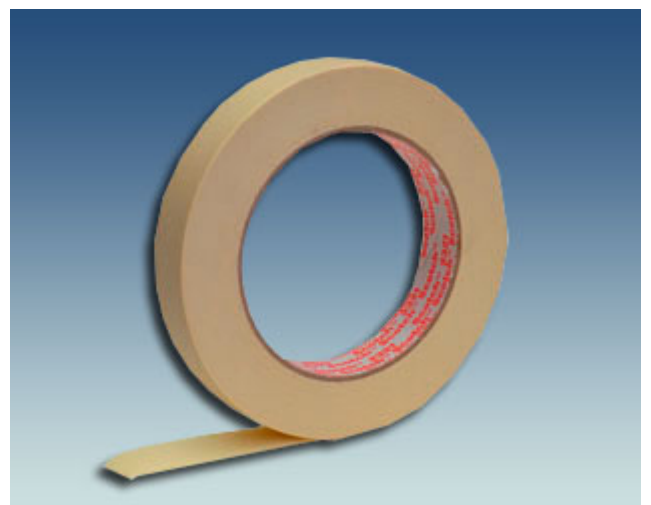

3M™ masking tapes are easily attached, hold well and are cleanly removable without leaving traces of adhesive. Their most frequent use is for varnishing, painting and special masking but thanks to their universal formulation and low price you can use them to pack, tie up, and mark various parts.

Type 3060 for up to 60°C

Construction: creped paper backing + crosslinked rubber resin adhesive.

Advantages:

- adaptability
- solvent resistance
- low thickness
- immediate adhesion

Type 2321 for up to 80°C

Construction: latex saturated creped paper backing + crosslinked rubber resin adhesive.

Advantages:

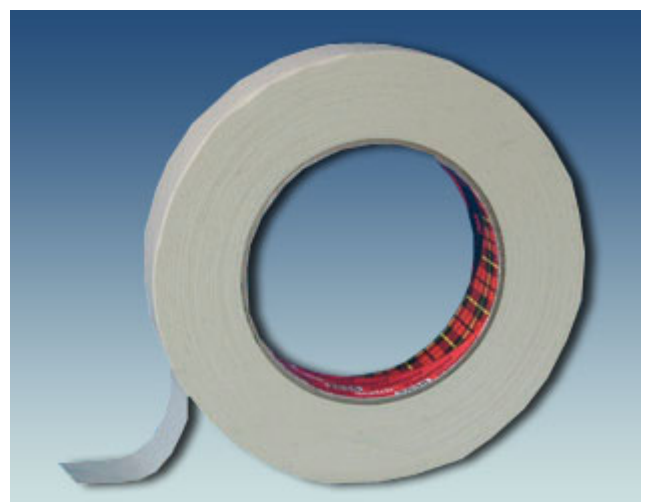

- conformability
- solvent resistance
- low thickness
- immediate adhesion
- easy hand tear

**Type 2364 for up to 100°C**

Construction: latex saturated smooth creped paper backing + crosslinked rubber resin adhesive

Advantages:

- good conformability
- controlled application
- solvent resistance
- low thickness
- immediate adhesion
- easy hand tear

Type 2836 for up to 140°C

Construction: latex saturated smooth creped paper backing + crosslinked rubber resin adhesive

Advantages:

- excellent conformability
- smooth surface
- controlled application
- solvent resistance
- low thickness
- excellent initial tack
- good humidity resistance
- edge tear resistance
- sliver resistance
- easy hand tear
